

[Episode 5] Saving lives by delivering medical supplies to hospitals using a deep tech distribution system and multi-modal delivery network.

Episode Introduction:

LifeBank is a health technology company which aims to improve the shortage of critical medical supplies such as blood, oxygen and medicine for people who need it the most including low income families in Nigeria and Kenya. The LifeBanks's supply chain engine offers 24/7 affordable and flexible delivery services. So far, Lifebank has saved the lives of >10,000 by moving >25,000 products in a timely and organised manner. Furthermore, LifeBank has developed robust distribution systems utilising AI and Blockchain, a web- based application system for blood donation, and recently launched a new COVID-19 home test kit as well. In this episode, Ms. Temie Giwa-Tubosun, the Founder of Lifebank will talk about her journey of starting Lifebank. *Read more about the Lifebank: [URL](#).

Guest lecturer:

- Ms. Temie Giwa-Tubosun, CEO of LifeBank

Ms. Temie Giwa-Tubosun studied International Public Management at the Middlebury Institute of International Studies. She has over 10 years of health management experience with the Department For International Development (DFID), World Health Organization, UNDP (United Nations Development Program), and the Lagos State Government. In 2014, the BBC listed her as one of the 100 Women changing the world. She was also recognized as an African Innovator by Quartz and the World Economic Forum. She is the Founder and CEO of LifeBank; Africa's healthcare supply chain engine. The company helps hospitals discover essential medical suppliers and delivers the supplies in the right condition and on time.
